

Meeting Room Mode

Your team's video meetings managed, at the touch of a button.

Meeting room mode (MRM) is the simple way to join scheduled video meetings with a single click. It works by integrating your videoconferencing unit with Videxio's **My Meeting Video** app and your company's existing calendar/room booking system.

My Meeting Video is then used to display the meeting schedule for the connected videoconferencing device. It shows all your upcoming video meetings in chronological order, as well as which video platform they're being hosted on.

All you have to do to dial into your next meeting is tap **JOIN!**

WHICH MEETINGS WILL APPEAR UNDER THE MEETING SCHEDULE IN MY MEETING VIDEO?

As long as a video meeting has been added to your video unit's calendar schedule, MRM supports one-tap to join for all these platforms:

- + VIDEXIO
- + ZOOM (*the individual Zoom Room subscription must support SIP protocol dial-in*)
- + SKYPE FOR BUSINESS (*requires Videxio for Video Units premium subscription*)
- + BLUEJEANS
- + CISCO WEBEX
- + CISCO SPARK
- + PEXIP
