- ✓ Reach audiences of any size
- ✓ Secure sharing & viewing

Videxio Live

- Live events & recordings. Do more with videoconferencing.

Videxio Live is an integrated feature of the Videxio Teams and Enterprise plans. It offers simple, user-friendly workflows for scheduling and creating live videoconferencing events and recordings in just a few clicks without requiring complex technical setup each time. Once enabled, all registered users can access the service at any time via our web app.

HIGHLIGHTS

- + **Video events with no infrastructure:** Each event is shared directly from your Videxio meeting room to your choice of the supported third-party streaming services.
- + **Reach audiences of any size:** Anyone with access to an event's sharing link can view the video stream through their browser, so there's no limit to the number of people who can watch. tracking content.
- + **Secure sharing & viewing:** Each event generates a unique sharing link. Share links however you want, in private or public channels, to control who watches.

FEATURES

- + Stream / record on-demand
 - Automated notification to video participants that a streaming / recording event has been enabled from the room
- + Self-service event scheduling
 - Native event scheduler inside the dashboard
 - Users can schedule events for any room they have access permissions for
- + Fast content sharing
 - Access your recorded content from the Videxio Live dashboard
 - Sharing links are listed for easy sharing and distribution
- + Easy YouTube integration
 - Schedule events and generate sharing links entirely from the Videxio Live dashboard
 - Connect multiple YouTube Live accounts (stream to one account per event)
 - Events registered as "unlisted" on the nominated account, meaning they are not publicly searchable on YouTube
- Video accessible only by account holder or via the correct link
- Edit YouTube listing to make content public
- + Custom integration
 - Connects your meeting room to a selection of third-party streaming platforms. (Click here to see the full list)
 - Options for connecting the integration to custom RTMP platforms
 - Choose your platform for each new event
- + Data Storage
 - All video data is supported via the selected third-party platform used to stream / record the event
 - Refer to the individual streaming service's terms of service for more information on permissions and limitations of data storage
